ERGONOMICS

High Breathability • Light and Comfortable • Glasses can be worn • Adjustable silicone strap

MAINTENANCE

One daily cleaning for the mask and cartridges:

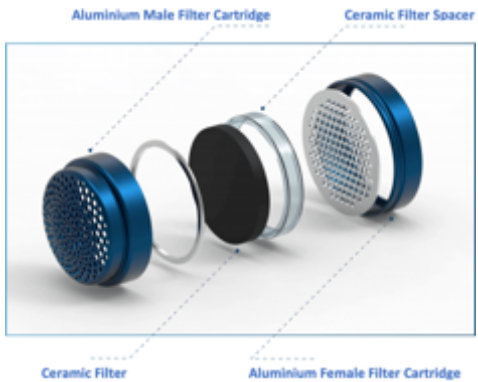

Place the **cartridges** in the oven at 90°C for 10 minutes and clean the rest of the mask with soapy water, or with a virucidal cleaning solution.

Once a month's simple regeneration of the filter cartridges:

Soak the **cartridges** in boiling water for 30 minutes. Then dry in the oven at 110°C for 1 hour.

// Warning //

X Never dismantle the integration capsules, their role is to protect the filter element and thus prevent damage to the filter medium
