

PROVEN • DURABLE • RELIABLE • VERSATILE
GERMAN TECHNOLOGY MAKES THE DIFFERENCE

BÄDER® Universal Tamper Proof Sealant Remover

Benefits:

- Easy Handling
- Solvent saving
- Universally applicable

The Universal Tamper Proof Sealant Remover is the first tamper proof sealant remover available on the market. It is ideally suited for quickly removing tamper proof sealants. This is particularly relevant in areas where frequent opening of the secured screw, plug or housing connection is necessary.

Our universal Tamper Proof Sealant Remover is a viscous solvent mixture which is applied dropwise to the screw lock varnish and washed off with a suitable solvent (e.g. acetone or butyl acetate) or the **BÄDER®** Universal Diluent after approximately 30 minutes of exposure.

Technical Data – Universal Tamper Proof Sealant Remover

Viscosity	Approximately 7,500 mPas
VOC Content	847 g/L
Application Temperature	+5°C to +30°C
Temperature Stability	Up to 125°C
Flashpoint	-20°C
Density	Approximately 0.86 g/cm ³
Package	50 ml
